CISRS TRAINING SET FOR CAPITAL GROWTH

CISRS scaffolder training in the capital has been boosted through the opening of a new facility near Wembley.

The new Park Royal training centre is situated on the West London College Campus, which offers a diverse range of construction-related courses.

Managed by Safety and Access, the centre will host a number of CISRS courses including the COTS New Entrant Course, Basic Scaffolding Inspection Course and the Manager and Supervisor Course.

There are also plans to introduce the CISRS Scaffolder CPD and System Scaffolding courses in the near future.

Rick Statham, joint Managing Director for Safety and Access, said: "We are extremely happy to finally have a permanent presence in the capital to support our clients. We have been planning this move for almost two years and we believe we have got this model right and can help to meet some of the demand in the region."

David Mosley, CISRS Scheme Manager, visited the new facility earlier this week and said CISRS accreditation would be finalised in the coming weeks.

"This modern, well equipped centre is a very welcome addition to CISRS delivery in the West London Area," he said. "Safety and Access has a long and proven track record as CISRS provider and I am sure they will be successful in this new venture with the college.

"There has previously been no CISRS provision in the west of London so this new centre will make it more convenient for those in the surrounding area to undertake CISRS training."

Notes to Editors:

The Construction Industry Scaffolders Record Scheme (CISRS) has been the industry recognised scaffold training scheme for over 40 years.

It is the preferred scaffolding qualification of all the major organisations including CSCS, NASC, HSE, Build UK, UNITE and the largest scaffold systems manufacturers.

The scheme, established in the 1960s, has 66,000+ CISRS card holders in the UK & 6,500+ OSTS card holders overseas.
