TG20:21 WEBINAR FOR CISRS SCAFFOLDING TRAINING PROFESSIONALS

The NASC is hosting a webinar next month to give CISRS providers and instructors a better understanding of the newly expanded and updated TG20:21 scaffolding compliance eGuide software.

The free session, run in conjunction with CADS, the developer behind TG:20:21, will take place on Thursday 13 May from 3pm.

It will be delivered by CADS's Terry Roberts, who will explain how the latest version expands upon TG20:13, making the process of producing compliant scaffolding – in accordance with the European standard BS EN 12811 – even simpler, and incorporating a wider range of scaffolding types.

A TG20:21 webinar held on Tuesday 27 April aimed at scaffolding contractors and principal contractors drew more than 300 delegates.

One of these attendees, Steve Deeble of BAM Nuttall Ltd, said: "This webinar was very useful. It was a thoroughly professional, informative and fluent session. Terry's grasp of the detail and ability to answer so many questions were especially impressive and noteworthy."

CISRS MD Dave Mosley said "I would urge as many of the providers and instructors as possible take the opportunity to attend this event, I was at the initial NASC/CADS webinar recently and it was excellent."

Notes to Editors:

The Construction Industry Scaffolders Record Scheme (CISRS) has been the industry recognised scaffold training scheme for over 40 years.

It is the preferred scaffolding qualification of all the major organisations including CSCS, NASC, HSE, Build UK, UNITE and the largest scaffold systems manufacturers.

The scheme, established in the 1960s, has 66,000+ CISRS card holders in the UK & 6,500+ OSTs card holders overseas.
