

PRESS RELEASE 19.08.2024

New CISRS SSPTS Cuplok Course Released

The Construction Industry Scaffolders Record Scheme (CISRS) is pleased to announce the release of a new and updated 2-day SSPTS Cuplok course.

As the use of systems scaffolding continues to grow in the UK, CISRS is making efforts to bring all courses in to a standardised format to ensure all SSPTS courses encompass all elements of system product knowledge and general updates to industry.

The 2 Day System Scaffolding Product Training Scheme (SSPTS) recognises the significant differences between the various system scaffold products covered by CISRS.

It provides structured training in system scaffold products for operatives who had previously only received training in tube and fittings. The scheme provides scaffolders with the skills and knowledge for the safe use of the system scaffold product, in accordance with the manufacturer's instructions.

2-Day SSPTS courses are available to all CISRS card holders who have completed Part 1 training.

Updates to SSPTS Layher and Plettac Metrix courses will soon also be available.

CISRS would like to thank David Abraham of Fulcrum Scaffold Safety Training & Working at Height Safety Solutions for his time and expertise with this project.

Further information about system scaffold training and inspection can be found at <https://cisrs.org.uk/system-scaffold-product-training-scheme/>

For those looking to book a SSPTS course, please contact your nearest training centre offering the relevant course. A list of training centres and their available courses can be found at –
